JETALON TO SELL CR-288® DIRECT

Now manufacturing and distributing its

innovative real-time liquid chemical concentration monitor

Pleasant Hill, CA – Nov. 1, 2009 Jetalon Solutions, Inc., a market leader in liquid chemical monitor and control systems, announced today that it will now be the sole manufacturer of CR-288®, Jetalon’s game-changing all purpose liquid chemical concentration monitor.

Jetalon, along with licensed distributors, will also handle product distribution.

“Of course, we are committed to customer support and warranty support will continue for existing product installations,” said Ronald Chiarello, Ph.D., president and CEO of Jetalon Solutions. “We invented and designed the product, so Jetalon customers are supported by our technical expertise.”

CR-288® is an all purpose liquid chemical concentration monitor. The Jetalon CR-288® concentration monitor uses an optical system to provide real-time temperature-compensated concentration measurement in a compact, ultrahigh-purity package. An in-line automated test, CR-288 offers multiple benefits over other test methods, including Auto-Titration and laboratory analysis.

Jetalon had licensed CR-288 to Swagelok in 2005. Jetalon terminated that agreement in January, 2010.
